

READING WITHOUT WALLS CHALLENGE PROJECTS

Create a poster AND a video for ONE of the books you read and turned a bookmark in for this semester. Remember, the purpose of this project is to PROMOTE A BOOK that you have read and enjoyed this semester OR to PROMOTE AWARENESS about an important issue. Other students will see your projects, so turn in work you're proud of.

*First decide if you want to promote a book or promote awareness. Both your poster and video should stick to the same book or issue.

Upload your completed poster and video to Google Drive and share it with kirsten.calmes@edmondschools.net.

POSTER

Use technology to create a poster to promote a book you read this semester or an issue you read about. You can use either Microsoft Publisher or any poster making app. Use your own device or access Publisher and poster apps in the library before school or during recess. Don't forget, if you need help – JUST ASK ME! I'm always happy to show you how to use Publisher, or help you with your project in any way.

PROMOTE A BOOK

Poster should include:

- An image that represents the book
- Title
- Author
- Short description of the story that makes other students want to read the book
- Your star rating (1-5)
- A quote about what you think of the book and your name. For example:
"This book is unforgettable. I couldn't stop reading."

-Mrs. Calmes

PROMOTE AWARENESS

Poster should include:

- An image or design that represents the issue
- Three quick facts about the issue
- Viewers should be able to clearly identify the issue and your message

VIDEO

Use iMovie or any other filming app you have access to complete a movie style trailer to promote a book that you have read and enjoyed this semester OR to promote awareness about an issue you read about this semester. Use your own device or access iMovie on the library's iPads before school or sign up to use them during recess.

You can always use images from the internet to create your project, *but the best videos include original films made by students*. Get creative! Use our green screen, Legos and the stop motion app, or a special effects app to add pizzazz to your films. You can get a group together and film your scenes in the library.

Don't forget, if you need help – JUST ASK ME! I'm always happy to show you how to use iMovie, or help you with your project in any way.

*For everyone in a group to get credit, each student needs to have read the book and done a book mark on it AND participated in filming original scenes. In other words, you can't just use internet images on a *group project*.

BEFORE YOU START FILMING look at iMovie and decide which template best fits the mood of your book or message.

Get a printed iMovie Planner from me- fill it out completely- and get it approved by me before you use the iPad.
